Environmental Geology

History

Environmental Geology is the continuation of Environmental Geology and Water Science, merged in 1993.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in form of an abstract or as part of a published lecture, review or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as – tacitly or explicitly – by the responsible authorities at the institution where the work was carried out. Transfer of copyright to Springer-Verlag becomes effective if and when the article is accepted for publication. The copyright covers the exclusive right (for U.S. government employees: to the extent transferable) to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or other reproductions of similar nature.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher. The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

An author may make an article published by Springer-Verlag available on his/her personal home page, provided the source of the published article is cited and Springer-Verlag is mentioned as the copyright holder. Authors are requested to create a link to the published article in LINK, Springer's internet service. The link must be accompanied by the following text: "The original publication is available on LINK at http://link.springer.de". While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the *Copyright Clearance Center*, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 1436-3798, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The *Canada Institute for Scientific and Technical Information (CISTI)* provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, CISTI, Ottawa K1A 0S2, Canada (Tel. +1-613-9939251; Fax +1-613-9528243; e-mail: cisti.docdel@nrc.ca).

Radon-222 in medicinal groundwaters of Szczawno Zdrój (Sudety Mountains, SW Poland): Przylibski TA, Mroczkowski K, Żebrowski A, Filbier P 429
Speciation of aluminum in the stream waters from the Susquehanna River watershed, Chesapeake Bay: Shuping Bi 300
Strontium-90 in surface and groundwater of the reclamation systems at the Chernobyl exclusion zone: Shevchenko A, Gudzenko V, Nasedkin I, Panasevitch E 1177
Tectonic impact on the Lake Sevan environment (Armenia): Karakhanian A, Tozalakyan P, Grillot JC, Philip H, Melkonyan D, Paronyan P, Arakelyan S 279
The contamination of former iron and steel works sites: Harber AJ, Forth RA 324
The distribution of heavy metals in an abandoned mining area; a case study of Strauss Pit, the Drake mining area, Australia: implications for the environmental management of mine sites: Clark MW, Walsh SR, Smith JV 655
The fate of trace elements in a large coal-fired power plant: Llorens JF, Fernández-Turiel JL, Querol X 409
The influence of advective transport on redox fronts in column experiments and their numeric modelling (Part 1): the influence of variable flow velocities on turnover rates of primary redox processes: Schlieker M, Schulz HD 1353
The nature of surface complexation: a continuum approach: Butkus MA, Grasso D 446
The relation between typical concentrations of chemical constituents in potable water and their injurious limits: El-Nakhal HA 27
The role of pollution versus natural geological sources for lead enrichment in recent lake sediments and surface forest soils: Brännvall M-L, Kurkkio H, Bindler R, Emteryd O, Renberg I 1057
The water supply of Constantinople: archaeology and hydrogeology of an early medieval city: Bono P, Crow J, Bayliss R 1325
Unfilterable "geoaerosols", their use in the search for thermal, mineral and mineralized waters, and their possible influence on

the origin of certain types of mineral waters: Krcmár B, Vylita T 678
Utilization of boron as a critical parameter in water quality evaluation: implications for thermal and mineral water resources in SW Germany and N Switzerland: Barth SR 73
Variability of natural effluents as an indicator of groundwater retention in the Carpathian foothills (southern Poland): Drużkowski M 90
Weathering process at the natural fission reactor of Bangombé: Bracke G, Salah S, Gauthier-Lafaye F 403

Cases and solutions

A regional study of saltwater intrusion in southeastern Nigeria based on the analysis of geoelectrical and hydrochemical data: Edet AE, Okereke CS 1278
A river runs through it: impact of acid mine drainage on the geochemistry of West Little Sugar Creek pre- and post-reclamation at the Green Valley coal mine, Indiana, USA: Brake SS, Connors KA, Romberger SB 1471
A sewage and sludge treated lake and its impact on the environment, Mysore, India: Sujatha SD, Sathyanarayanan S, Satish PN, Nagaraju D 1209
A slow-release K^+ fertilizer from residues of the Brazilian oil-shale industry: synthesis of kalsilite-type structures: Mangrich AS, Tessaro LC, Anjos AD, Wypych F, Soares JF 1030
Accumulation of elements in plants and soils in and around Mangampeta and Vemula barite mining areas, Cuddapah District, Andhra Pradesh, India: Raghu V 1265
Accumulation rates and mass calculations of Zn and Hg in recent sediments, Göta älv estuary, Sweden: Brack K, Johannesson LT, Stevens RL 1232
An intelligent database for managing geoenvironmental change within harbours: Yang Y, Rosenbaum MS, Burton CL 1224
Animal burrowing and associated formation of large desiccation cracks as factors of a rapid restoration of soil cover in flooded farmlands: Kazanci N, Emre O, Alcicek MC 964
Annual maxima in Zn concentrations during spring snowmelt in streams impacted by mine drainage: Brooks PD, Mc Knight DM, Bencala KE 1447
Arsenic and mercury contamination in 31 cores taken in 1965, St. Anna Trough, Kara Sea, Arctic Ocean: Siegel FR, Kravitz JH, Galasso JJ 528
Assessment of landslide susceptibility on the natural terrain of Lantau Island, Hong Kong: Dai FC, Lee CF, Li J, Xu ZW 381
Assessment of soil and water contamination around an ash-disposal site: a case study from the Seyitömer coal-fired power plant in western Turkey: Güleç N, Günal B (Çanci), Erler A 331
Bacterial mitigation of pollutants in acid drainage using decomposable plant material and sluge: Harris MA, Ragusa S 195
Barium and radium discharged from coal mines in the Upper Silesia, Poland: Pluta I 345
Causes, mechanism and environmental impacts of instabilities at Himmetoğlu coal mine and possible remedial measures: Ulusay R, Gökçeoğlu C, Sönmez H, Tuncay E 769
Biogeochemical and environmental study of the chromite-rich ultramafic terrain of Malakand area Pakistan: Kfayatullah Q, Tahir Shah M, Arfan M 1482
Changes of the chemical composition of discharged coal mine water in the Rontok Pond, Upper Silesia, Poland: Pluta I, Trembaczowski A 454
Characterization of corrosion products in the permeable reactive barriers: Roh Y, Lee SY, Elless MP 184
Characterization of groundwater flow in the Bailin hazardous waste-disposal site (Huesca, Spain): Sánchez Navarro JA, López C, Pérez García A 216
Characterization of total suspended particles around a power station in an urban coastal area in eastern Spain: Boix A, Jordan MM, Querol X, Sanfeliu T 891
Chemical behavior of the Salí River, Province of Tucumán, Argentina: Galindo MC, Vece MB, Perondi ME, Monserrat Aráoz M, García G, del V. Hidalgo M, Apella MC, Blesa MA 847
Chemistry and discharge characteristics of Odukpani junction springs, Calabar Flank, south-eastern Nigeria: Edet AE, Uka NK, Offiong OE 1214
Comparative zinc dynamics in Atlanta metropolitan region stream and street runoff: Rose S, Crean MS, Sheheen DK, Ghazi AM 983
Contamination of two Oregon reservoirs by cinnebar mining and mercury amalgamation: Ambers RKR, Hygelund BN 699
Controls on the nature and distribution of an alga in coal mine-waste environments and its potential impact on water quality: Brake SS, Dannelly HK, Connors KA 458
Copper accumulation by *Polygonum microcephalum* D. Don and *Rumex hastatus* D. Don from copper mining spoils in Yunnan Province, P.R. China: Tang S, Fang Y 902
Delineation of groundwater potential zones and electrical resistivity studies for groundwater exploration: Sree Devi PD, Srinivasulu S, Raju KK 1252
Detection of Hg pollution by stream sediment geochemistry in the Bisagno valley (Genoa, Italy): Marini L, Ottonello G, Canepa M, Cipolli F, Vetuschi Zuccolini M 234
Determination of variables in the prediction of strontium distribution coefficients for selected sediments: Pace MN, Rosentreter JJ, Bartholomay RC 993
Dissolution of fluoride in groundwater: a water-rock interaction study: Saxena VK, Ahmed S 1084
Eco-environmental degradation and causal analysis in the source region of the Yellow River: Wang G, Qian J, Cheng G, Lai Y 884
Environmental restoration measures on the Tennessee–Tombigbee Waterway – an update: McClure IV ND, Connell Sr. NL 566
Factors controlling heavy-metal dispersion in mining areas: the case of Vigonzano (northern Italy), a Fe-Cu sulfide deposit associated with ophiolitic rocks: Dinelli E, Tateo F 1138
Failure of an industrial wastewater lagoon in a karst terrain and remedial action: Memon BA 1424
Field investigation of the natural attenuation and intrinsic biodegradation rates at an underground storage tank site: Kao CM, Wang YS 622
Geochemistry and assessment of metal pollution in soils and river components of monsoon-dominated environment near Karwar, Southwest Coast of India: Manjunatha BR, Balakrishna K, Shankar R, Mahalingam TR 1462
Geoenvironmental effects of groundwater regime in Andhra Pradesh, India: Rao PB, Subrahmanyam K, Dhar RL 632
Geological barrier – a natural rock stratum for preventing confined karst water from flowing into mines in North China: Zhou W, Li G 1003
Geological factors for hazardous debris flows in Hoser, central Taiwan: Chen H, Su D-Y 1114

Geophysical investigations for the location of a proposed dam in Al Bishriyya (Al Aritayn) area, northeast Badia of Jordan: Batayneh AT, Al Zoubi AS, Abueladas AA 918
Geostatistical approach for identification of transmissivity structure at Dulliu area in Taiwan: Lin Y-P, Lee C-C, Tan Y-C 111
Groundwater contamination: risk management and assessment for landfills in Mar del Plata, Argentina: Bocanegra E, Massone H, Martínez D, Civit E, Farenga M 732
Heavy metal distribution and environmental status of Doon Valley soils, Outer Himalaya, India: Purohit KK, Mukherjee PK, Khanna PP, Saini NK, Rathi MS 716
Heavy metals on tidal flats in the Yangtze Estuary, China: Chen Z, Kostaschuk R, Yang M 742
Heavy metals pollution of aquatic ecosystems in the vicinity of a recently closed underground lead-zinc mine (Basque Country, Spain): Marqués MJ, Martínez-Conde E, Rovira JV, Ordóñez S 1125
Historical pollution trends in a disturbed, estuarine sedimentary environment, SW Sweden: Brack K, Stevens RL 1017
Hydrogeochemistry of mine, surface and groundwaters from the Sanggok mine creek in the upper Chungju Lake, Republic of Korea: Lee CH, Lee HK, Lee JC 482
Hydrogeological and hydrochemical frameworks of regional aquifer system in Kali-Ganga sub-basin, India: Umar A, Umar R, Ahmad MS 602
Hydrogeomorphological and groundwater prospects of the Pageru river basin by using remote sensing data: Sree Devi PD, Srinivasulu S, Raju KK 1088
Impact of hydrology on the Port-Harcourt–PataniWarri Road: Abam TKS, Ofoegbu CO, Osadebe CC, Gobo AE 153
Intensive agriculture, wetlands, quarries and water management. A case study (Campo de Dalias, SE Spain): Pulido-Bosch A, Pulido-Leboeuf P, Molina-Sánchez L, Vallejos A, Martin-Rosales W 163
Investigation of groundwater contamination using electric and electromagnetic methods at an open waste-disposal site: a case study from Isparta, Turkey: Karlik G, Kaya MA 725
Investigation of the impact of salt and sand harvesting activities on the Timboni well field, Gongoni, Malindi District, Kenya: Opiyo-Akech N, Olago DO, Dindi EW, Ndege MM, Njue F 99
Isotopic geochemistry of the groundwater system in arid and semiarid areas and its significance: a case study in Shiyang River basin, Gansu province, northwest China: Shi JA, Wang Q, Chen GJ, Wang GY, Zhang ZN 557
Major ion chemistry of Renuka Lake and weathering processes, Sirmaur District, Himachal Pradesh, India: Das BK, Kaur P 908
Management of topsoil for geo-environmental reclamation of coal mining areas: Ghose MK 1405
Mining subsidence and its effect on the environment: some differing examples: Bell FG, Stacey TR, Genske DD 135
New methods for searching for waste disposal sites in the Chiang Mai-Lamphun basin, northern Thailand: Dorn M, Tantiwanit W 507
Nitrate temporal and spatial patterns in 12 water-supply wells, Yucatan, Mexico: Pacheco J, Mann L, Cabrera A, Steinich B, Escolero O 708
Numerical analysis of the transport and restoration schemes of aqueous oil in soils: Xilai Z, Hanxue Q, Jing J, Guanqun L 750
Numerical assessment of seawater intrusion in the Tripoli region, Libya: Sadeg SA, Karahanoğlu N 1151
Numerical simulation of sea water intrusion near Beihai, China: Zhou X, Chen M, Ju X, Ning X, Wang J 223
Origin of arsenic in the groundwater of the Rioverde basin, Mexico: Planer-Friedrich B, Armienta MA, Merkel BJ 1290
Physico-chemical processes in a vadose zone during the infiltration of treated wastewater used for irrigation: application of the NETPATH model: Esteller MV, Morell I, Almeida C 923
Pore structure of sheared coals and related coalbed methane: Li H, Ogawa Y 1455
Quantification of mine-drainage inflows to Little Cottonwood Creek, Utah, using a tracer-injection and synoptic-sampling study: Kimball B, Runkel RL, Gerner LJ 1390
Radon emanation along the Dead Sea transform (rift) in Jordan: Atallah MY, AI-Bataina BA, Mustafa H 1440
Radon in groundwater as a tracer to assess flow velocities: two test cases from Israel: Kafri U 392
Regional risk assessment of karst collapse in Tangshan, China: Hu RL 1377
Rehabilitation of industrial areas: case histories from England and Germany: Bell FG, Genske DD, Bell AW 121
Remediation of heavy metal-contaminated sediments by solid-bed bioleaching: Löser C, Seidel H, Hoffmann P, Zehnsdorf A 643
Roles of hydrogeochemical evaluations in estimating protection zones of Koçpınar springs in Aksaray, central Anatolia, Turkey: Elhatip H, Afşin M 1010
Saline fresh water interface structure in Mahanadi delta region, Orissa, India: Radhakrishna I 369
Sedimentation in bottomland hardwoods downstream of an east Texas dam: Phillips JD 860
Statistical analysis of landslide susceptibility at Yongin, Korea: Lee S, Min K 1095
Studies of interfacial reactions between arsenic and minerals and its significance to site characterization: Lin ZX, Puls RW 1433
Subsurface grout barriers for ground stabilization in dolomite areas near Carletonville, South Africa: Swart CJU, van Schalkwyk A 592
Suspended sediments in karst spring waters near Massa (Tuscany), Italy: Drysdale R, Pierotti L, Piccini L, Baldacci F 1037
The effect of clay dehydration on land subsidence in the Yun-Lin coastal area, Taiwan: Liu C-W, Lin W-S, Shang C, Liu S-H 518
The effect of sewage sludge and green manure on the erodibility of two mine tailings materials: Harris MA 1367
The hydraulic conductivity of the fractures intersecting Cambrian sandstone rock masses, central Jordan: El-Naqa A 973
The impact of man-made hydrology on the lower stream bed of the Salado River drainage basin (Argentina): Conzonno V, Miretzky P, Cirelli AF 968
The impact of paleo-channel on groundwater contamination, Andhra Pradesh, India: Subrahmanyam K, Yadaiah P 169
The impacts of hydro-electric construction works on the hydrology of a subalpine area in Australia: Lawrence RE 612
The mineralogy of arsenic in uranium mine tailings at the Rabbit Lake In-pit Facility, northern Saskatchewan, Canada: Pichler T, Hendry MJ, Hall GEM 495
The natural enrichment of ferruginous weathering products and its implication for water quality in the Hunchun Basin, China: Moon J-W, Moon H-S, Song Y, Kang J, Lee G H, Kim H-D 869
The process and driving forces of eco-geo-environmental evolution of the Songnen Plain in northeast China since the Quaternary: Zhang SJ, Wang D 1362

The protection of karst water resources: the example of the Larzac karst plateau (south of France): Plagnes V, Bakalowicz M 349
The role of arsenic-bearing rocks in groundwater pollution at Zimapán Valley, México: Armienta MA, Villaseñor G, Rodriguez R, Ongley LK, Mango H 571
Towards developing a geoscientific approach to sustainable agricultural and rural development: Al Bakri D 543
Trace metals in acid sediments and waters, Pimpama catchment, southeast Queensland, Australia: Preda M, Cox ME 755
Tracing the source of mercury contamination in the Dorena Lake watershed, Western Oregon: Hygelund BN, Ambers RKR, Ambers CP 853
Type-curve analysis of water-level changes induced by a longwall mine: Karaman A, Carpenter PJ, Booth CJ 897
Uranium depositional controls at the Prairie Flats surficial uranium deposit, Summerland, British Columbia: Tixier K, Beckie R 1242
Using sediment chemistry to determine the impact of treated wastewater discharge on a natural wetland in New Zealand: Chagué-Goff C, Kosen MR 1411
Variability of metals in reservoir sediment from two adjacent basins in the central Great Plains: Christensen VG, Juracek KE 470
Water content variations and respective ecosystems of sandy land in China: Feng Q, Cheng GD, Endo KN 1075
Weathering of marbles and granites in marine environment: petrophysical properties and special role of atmospheric salts: Chabas A, Jeannette D 359
Yearly changes in the seasonal frequency and duration of shortterm acid pulses in some Nova Scotia, Canada streams: Clair TA, Bobba AG, Miller K 582
